HealthWay Inline

Front & Side Load DFS Solutions

 Disinfecting Filtration System (DFS) is our proprietary electronically enhanced filtration technology.

Features

Total System Efficiency: Captures 98% of particles at 0.3 microns (MERV 16)

Low Pressure Drop: 0.27" wc at 500 FPM

Extended Filter Life: V-bank design enables up to 200 grams of holding capacity yielding up to 36 months of filter life. Suggested change out at 0.54" wc.

Scalable: Modular design allows for flexible array configuration to fit HVAC dimensions and CFM requirements.

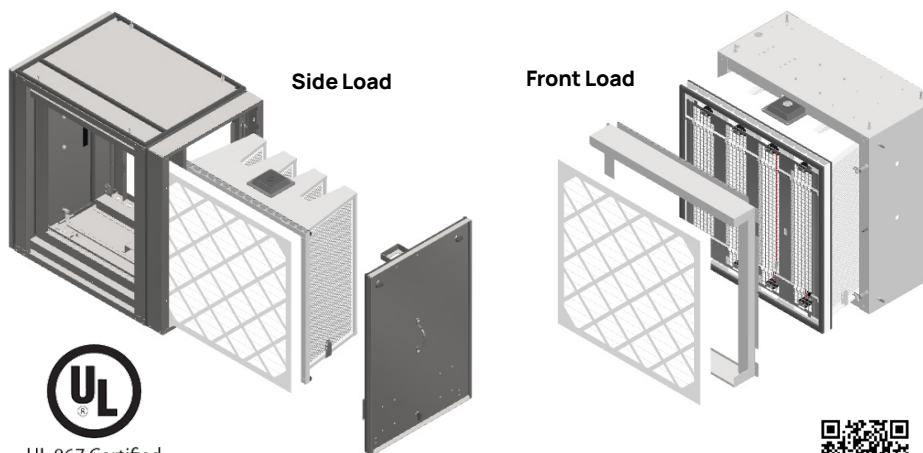

Ease of Installation Maintenance: Filter access is available in front or side load orientation.

Bypass Elimination: Proprietary gasketing and interlocking fasteners are engineered to prevent filter bypass.

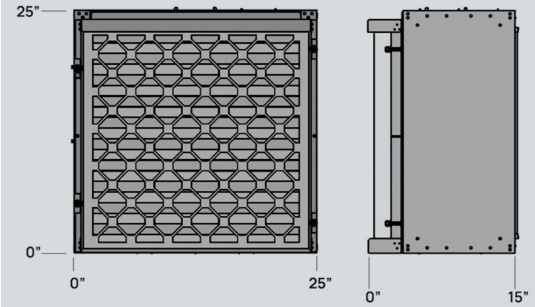

Energy Consumption: Operating power is less than 9 watts.
