Commercial Spaces

PROFESSIONAL DFS  
AIR FILTRATION SYSTEMS

# Intellipure for Commercial Spaces DFS Filtration Systems

Intellipure's patented DFS technology (Disinfecting Filtration System) is helping businesses everywhere improve their air quality. Intellipure is the only system to effectively address all three pollutant categories: microorganisms, particles and VOC's. These systems have been proven to capture 99.99% of particles down to 0.007 microns, which is smaller in size than all known ultrafine virus particles including Covid-19. This technology is currently being used and implemented in offices, event centers, retail stores and more.

## Better, Safer Spaces Powered by Intellipure

- Educational Environments
- Hospitality & Restaurants
- Office Buildings
- Healthcare Facilities
- Residential Applications
- Entryways and Lounges

## Partners in Clean Air Across the Globe

- NYC Schools
- Verizon
- Cleveland Clinic
- NYC Hospitals
- HYATT Hotels
- Hilton Hotels
- Chicago Public Schools

### FILTRATION EFFICIENCY
