PROFESSIONAL DFS
AIR PURIFICATION SYSTEM

Intellipure Compact Professional Air Purification System

The Intellipure® Compact air purifier features advanced, award-winning, and patented DFS technology. The simple, clean design complements any bedroom or small living space decor. It is ultra-quiet and has been specially designed to deal with ultrafine particles, gas, and odor adsorption. Recommended for spaces 500 sq. feet and below.

SPECIFICATIONS

Coverage: Up to 500 sq/ft

Dimensions (inches): 11.22 x 15.15 x 22.23

Weight 17lbs (8kg)

Colors: White

Wall Mount: Optional

120V 60Hz or 230V 50Hz

Blower Speed	Energy Usage (Watts)	Air Flow	Sound Level (dB)
Low	9	22 CFM	34
Med	15	49 CFM	45
High	25	79 CFM	53
Turbo	61	150 CFM	63

We pride ourselves on using DFS for total system efficiency, meaning every Intellipure® Compact air purifier achieves greater than 99.97% at 0.3 micron.

FEATURES

- Particle efficiency - 99% down to 0.007 micron*
- 6-stage VOC adsorption filter for heavy removal of harmful gases and odors
- Patented DFS technology efficiently removes up to 99% of airborne mold, bacteria, and viruses passing through the system
- Each machine is independently tested and certified to guarantee better than HEPA efficiency

* Data source is from [IUUCB](#). Please note that efficiency results can vary by product, application, and utilization of DFS

- Substantial reduction in airborne microorganisms, chemicals, offensive gases, odors, and smoke.
- Less dust and dander, pollen, dust mite waste, bacteria, mold, fungi and virus protection
- Compact, ultra slim design
- Easy to maintain
- A clean and fresh smelling environment
- The revolutionary DFS technology reduces bioburden and inhibits microorganism growth passing into the system through microbiostasis condition
